- ✓ Japan – NTK vibrators, matching Ace steel, titanium transducer.
- ✓ Japanese NTK series transducer, imported cylinder, strong power, good stability.
- ✓ Anti body back plus coaxial design of direct pressure, pressure equalization is applied to improve the welding precision.
- ✓ 1000W to 4200W super power output, suitable for large plastic Part welding, older good effect.
- ✓ alloy layer welding mold, easy to wear and durable.
- ✓ Unique horizontal screw design, mold easier to debug.
- ✓ Limit welding systems, welding after the work piece will not spill glue.
